Update your Camera Driver in Windows 10

Click on your Windows Key, or Search for "Device Manager"

Open the Device Manager and find your Cameras

Right Click on your Camera* and Click Update Driver

*You may have different name(s) for your installed Cameras
Search automatically for updated driver software

Search automatically for updated driver software

Windows will search your computer and the Internet for the latest driver software for your device, unless you've disabled this feature in your device installation settings.

Browse my computer for driver software
Locate and install driver software manually.
